AUTHOR INDEX

Vol. 63 (1972)

Abe, Chiyoji (阿部千代治) 503
Akagi, Tadaatsu(赤木忠厚) 307
Akao, Mitsutaro (赤尾三太郎) 1
Aki, Osami (安芸修躬) 523
Akiyama, Kazuko (秋山和子) 231
Amemiya, Yumiko (雨宮由美子) 153
Anan, Francisco K. (阿南功一) 539
Aoki, Ken (青木 健) 785
Aoki, Takakazu (青木隆一) 217
Aoshima, Michiko (青島迪子) 281
Arakawa, Masao (荒川順生) 487
Araki, Misako (荒木美佐子) 161
Arimori, Minoru (有森 稔) 725

Baba, Tsuneo (馬場恒男) 785
Bhattacharaya, Malaya 299

Carruthers, Chris 299

Dempo, Kimimaro (伝法公麿) ...21, 31, 41, 747

Endo, Hideya (遠藤英也) 511

Fujii, Keiji (藤井敬二) 135
Fujii, Setsuko (藤井節子) 785
Fujii, Setsuro (藤井節郎) 605, 685
Fujinaga, Kei (藤永 憲) 801
Fujiwara, Yoshisada (藤原美定) 291
Fukui, Hideaki (福井秀明) 415, 615
Fukunishi, Ryo (福西 亮) 575
Fushimi, Katsumasa (伏見勝正) 383

Goto, Kunihiko (後藤邦彦) 505
Goto, Masayoshi (後藤正義) 371, 505
Gotohda, Eiki (後藤田栄貴) 261

Hamaoka, Toshiyuki (浜岡利之) 273, 633
Hanaichi, Takamasa (花市敬正) 445, 459
Hasegawa, Harumi (長谷川晴己) 361, 395
Hashimoto, Yoshiyuki (橋本嘉幸) 79, 637
Hashinotsume, Mamoru (橋之爪 守) 217
Hatano, Motoichi (波多野基一) 647
Hattori, Takao (服部孝雄) 387, 517
Hayashi, Shigejiro (林 繁次郎) 491
Hayashi, Yoshito (林 義人) 591
Hiasa, Yoshio (日浅義雄) 419
Higashi, Tokuhiko (東 徳彦) 57
Higashino, Kazuya (東野一弥) 217
Hinuma, Yorio (日沼頼夫) 49, 87
Hirai, Hidematsu (平井秀松) 63, 189
Hirai, Kei-ichi (平井圭一) 665
Hiraki, Kiyoshi (平木 潔) 361, 395
Hirata, Katsuji (平田克治) 517
Hirata, Shigeho (平田重穂) 539
Hirono, Iwao (広野 巌) 383
Hisamatsu, Takashi (久松 充) 483
Homma, J. Yuzuru (本間 譲) 503
Honda, Tadayoshi (本多忠敬) 167
Horio, Takekazu (堀尾武一) 95, 201, 239
Hoshi, Akio (星 昭夫)
.....225, 279, 353, 375, 409, 503
Hosoi, Kazuo (細井和雄) 239
Hosokawa, Masuo (細川真澄男) 261
Huang, Guang-Fu (黄 光復) 161

Ichihashi, Hidehito (市橋秀仁) 531
Ichishita, Hiroko (市下浩子) 701
Ida, Shiroh (井田士朗) 49
Ikeda, Toshihiko (池田俊彦) 387
Ikegami, Harumichi (池上晴通) 605
Ikemoto, Kazuto (池本和人) 141
Imamura, Akira (今村 詮) 471
Imamura, Kiichi (今村喜一) 555
Imasato, Katsujiro (今里勝次郎) 231, 743
Imura, Hiroshi (居村 洋) 685
Inokuchi, Kiyoshi (井口 潔) 387
Inomata, Motoko (猪俣素子) 119
Inoue, Masayasu (井上正康) 795
Ioki, Yoshikazu (五百城義和) 471
Irino, Shozo (入野昭三) 395
Isaka, Hidehiko (井坂英彦) 63, 747
Ishii, Masataka (石井正大) 531
Ishimoto, Akinori (石本秋稔) 563
Ishizawa, Minoru (石沢 実) 511
Isobe, Akihiko (磯部明彦) 427
Ito, Ichiji (伊藤一二) 517
Ito, Masao (伊藤正夫) 143, 209

INTERIM TITLE INDEX

Vol. 63 (1972)

Acetamide, 2,7-fluorenylbis-, unusual proliferatilon of bile-duct cells in ICR female mice given, while nursing sucklings.....507

————, **N,N'-2,7-fluorenylenebis-,** histogenesis and autoradiography of adenocarcinoma of the glandular stomach in rats induced by oral administration, combined with irradiation to the stomach region.....143

Acid phosphatase, change in, during azo-dye carcinogenesis.....41

—— ———— and esterase, deviations in isozyme patterns of, and in ultrastructures of Yoshida ascites hepatomas from rat hepatocytes.....747

ACI/N rat, induction of urinary bladder tumors in, by butyl(3-carboxypropyl)-nitrosoamine, a major urinary metabolite of butyl(4-hydroxybutyl)nitrosoamine.....637

Adenocarcinoma, histogenesis and autoradiography of, of the glandular stomach in rats induced by oral administration of N,N'-2,7-fluorenylenebisacetamide combined with irradiation to the stomach region.....143

————, thyroid, microscopic lung metastasis from, discovered at autopsy.....437

Adenovirus type-2. Size distribution of RNA species hybridizable to cellular or viral DNA in the cells transformed by.....801

———— type-3, bovine. Neoplastic transformation of hamster cell *in vitro* by.....415

———— type-3, bovine, growth characteristics of tumors induced by, in hamsters of various ages.....615

———— type-12 transformed and tumor cells. Relationship among tumorigenicity, T antigen, and vir.s-specific transplantation antigen in.....307

———— type 12-induced tumor cells, ultrastructural findings of, treated by differential hypothermia.....725

Agglutinability, decrease in, of cultured tumor cells to concanavalin-A at the plateau of cell growth.....505

Aldolase, glucose-6-phosphatase, and alkaline phosphatase, changes in the activities of, during azo-dye carcinogenesis.....31

Alkaline phosphatase, glucose-6-phosphatase, and aldolase, changes in the activities of, during azo-dye carcinogenesis.....31

Antibodies to a new antigen induced by Epstein-Barr virus in patients with nasopharyngeal carcinoma, leukemia, malignant lymphoma, and in control groups...49

Antigen, a new, induced by Epstein-Barr virus in patients with nasopharyngeal carcinoma, leukemia, malignant lymphoma, and in control groups. Antibodies to.....49

————, T, tumorigenicity, and virus-specific transplantation antigen, relationship among, in adenovirus type 12 transformed and tumor cells.....307

————, virus-specific transplantation, tumorigenicity, and T antigen, relationship among, in adenovirus type 12 transformed and tumor cells.....307

————, a hetero-organic, of a rat ascites hepatoma.....579

————, Epstein-Barr virus-related, an immuno-electron microscopic analysis of, in Burkitt lymphoma cells.....629

————, avian leucosis group-specific complement-fixing, subcellular localization of, in mouse ascites sarcoma cells (SR-C3H/He cells) induced by Schmidt-Ruppin strain of Rous sarcoma virus.....657

Antigenic change in mouse epidermis at various stages of neoplastic transformation.....299
Antileukemic activity, influence of route of administration on, of cyclocytidine.....279
Antitumor action, mechanism of, of dimethanesulfonylthiopentane.....701
———— **activity** of haloacetylphenothiazines against ascites sarcoma-180 225
———— ——— of cyclocytidine in a variety of tumors.....353
———— ——— of the yeast mannan preparation in relation to the effect of chemical modification 365
———— ——— of haloacetylphenothiazines. Effect of structural modification on 375
———— ———, potentiation of, of cyclophosphamide by centrophenoxine 409
———— ——— of protein moiety of the *Pseudomonas aeruginosa* endotoxin.....503
———— ——— and immunosuppressive activity of alkyldithiopurine derivatives 523
———— **drugs,** some, effect of, on metabolism of mouse liver catalase.....539
———— **agents.** Sensitivity of transplantable rat leukemia, DBLA-6, to.....281
Arginase in human urogenital tumors.....693
Ascites hepatoma, AH-13. Peritoneal bleeding of the rat bearing.....11
———— ————. α-Fetoprotein in rats transplanted with.....189
———— ————. Polynucleotide ligase in rat tissues and.....251
———— ———— 109A. Serum glycoprotein levels in the rat bearing.....591
———— ————, rat. A hetero-organic antigen of.....579
——— **sarcoma cells,** mouse, (SR-C3H/He cells), subcellular localization of avain leucosis group-specific complement-fixing antigens in, induced by Schmidt-Ruppin strain of Rous sarcoma virus 657
———— **tumors,** islet-forming, of rat. Radiosensitivity of.....337
Autoradiography and histogenesis of adenocarcinoma of the glandular stomach in rats induced by oral administration of N,N′-2,7-fluorenylenebisacetamide combined with irradiation to the stomach region 143
Azo-dye carcinogenesis. Fluctuation of various cell populations and their characteristics during 21
———— carcinogenesis. Changes in the activities of glucose-6-phosphatase, aldolase, and alkaline phosphatase during 31
———— carcinogenesis. Change in acid phosphatase during 41
Azobenzene, 4-(dimethylamino)-, selective inhibition of RNA polymerase activity in rat liver nuclei by, and effect of nitrofurans on liver RNA metabolism associated with prevention of carcinogenesis 1
————, ————. Influence of blood transfusion on induction of hepatoma in rats fed.....131
Benzene hexachloride, hepatocarcinogenic effect of α-, β-, γ-, and δ-isomers of, in mice.....393
Benzidine, 3,3′-diamino-, and related compounds, mitochondrial oxidation of, and their possible relation to carcinogenesis 665
3,4-Benzopyrene. Photoinduced phenoxy radical of 119
Bile-duct cells, unusual proliferation of, in ICR female mice given 2,7-fluorenylbiascetamide while nursing sucklings.....507
Bladder tumor, urinary, induction of, in ACI/N rats by butyl(3-carboxypropyl)-nitrosoamine, a major urinary metabolite of butyl(4-hydroxybutyl)nitrosoamine 637
Bleomycin, lethal effect of, on cultured mouse L cells: Comparison between fractionated and continuous treatment...645
Bone marrow. Induction of rat osteosarcoma by inoculation of murine sarcoma virus into 141

Carbazilquinone. Complete inhibition of mouse lymphoid leukemia L-1210 by 487
Carcinogenesis, azo-dye. Fluctuation of various cell populations and their characteristics during 21
————————, azo-dye. Changes in the activities of glucose-6-phosphatase, aldolase, and alkaline phosphatase during 31
————————, azo-dye. Change in acid phosphatase during.....41
———————— by vaginal transplants from ovariectomized, neonatally estrogenized mice into ovariectomized normal hosts.....73
————————, strain difference in, by urethan administration to suckling rats 209
————————, transplacental, by urethan in mice: teratogenesis and carcinogenesis in relation to organogenesis.....731
Carcinogenicity examination of some edible plants 383
Cell line, human lymphoblastoid, dual infection of, with Epstein-Barr virus and Rauscher leukemia virus 395
————, virus-persistent, establisment of, and deviation of malignant cell clones from rat osteosarcoma induced by a murine sarcoma virus (Moloney)...459
—— **populations,** various, fluctuation of, and their characteristics during azo-dye carcinogenesis.....21
Centrophenoxine. Potentiation of antitumor activity of cyclophosphamide by 409
Charge transfer in the molecular interaction of carcinogenic 4-nitroquinoline 1-oxides and DNA, with special reference to analysis at the nucleoside level...427
Chemotherapeutic agent, prophylactic use of, on liver metastasis 531
Chromatin, effect of injection of, from Rhodamine sarcoma into rats on pI-isozymes of liver pyruvate kinase.....239
———————— fraction derived from nuclei of Ehrlich ascites tumor cells, immunosuppressive activity of 633
Chromosome studies in experimental mouse gliomas.....181
Cirrhosis, liver, a comparative geo-pathological study of, and primary hepatic cancer between Cambridge and Tokyo...765
Concanavalin-A, decrease in agglutinability of cultured tumor cells to, at the plateau of cell growth.....505
————————, rôle of, in tumor cell agglutination and adhesion to macrophages 795
Cryosurgical freezing, effect of, on the tumor growth.....625
Cycasin. High yield of hepatic tumors in rats by.....575
Cyclocytidine. Influence of route of administration on antileukemic activity of 279
————————, antitumor activity of, in a variety of tumors 353
————————, **2,2-*O*-,** effect of, on transplanted lymphocytic asrcoma and reticulum cell sarcoma in mice.....379
Cyclophosphamide, potentiation of antitumor activity of, by centrophenoxine 409
Cytocidal action of Mitomycin-C. Quantitative clonal growth of mammalian cells: Its application for quantitative study of 773
Dextran sulfate. Decrease of saturation density in cultured tumor cells by.....371
Dietary modification, effect of, on tumor growth in mice bearing sarcoma-180 and Ehrlich carcinoma.....547
Dinicotinic acid, 6,6′-dithio-, chemical modification of cell membrane of Yoshida sarcoma cells by, and its effect on sensitivity to nitrogen mustard 757
DNA, chemical binding of carcinogenic 4-nitroquinoline 1-oxide derivatives with, *in vivo* and *in vitro*.....161
——, replicating, and nuclear membrane, relation between, in L5178Y leukemia cells 291
—— and carcinogenic 4-nitroquinoline 1-oxides, charge transfer in the molecular interaction of, with special reference to analysis at the nucleoside level.....427

——, viscosity of, effect of 4-nitroquinoline 1-oxide and related carcinogens on, at elevated temperatures.....639
——, cellular or viral, in the cells transformed by adenovirus type-2. Size distribution of RNA species hybridizable to 801
Ehrlich ascites tumor cells. Immunosuppressive activity of chromatin fraction derived from nuclei of.....633
——— **carcinoma,** induction of resistance against, by tumor cells sensitized with immunized rabbit serum.....173
——— **solid carcinoma.** A hypoalbuminemic substance from.....277
Electron spin resonance study on the free radical production from N-methyl-N′-nitro-N-nitrosoguanidine 471
Endocrine tumors, spontaneous, in mastomys 135
Endotoxin, *Pseudomonas aeruginosa.* Antitumor activity of protein moiety of.....503
Epidermis, mouse, antigenic changes in, at various stages of neoplastic transformation 299
Epstein-Barr Virus, antibodies to a new antigen induced by, in patients with nasopharyngeal carcinoma, leukemia, malignant lymphoma, and in control groups 49
——— ———, infective, production of, in a Burkitt lymphoma cell line P3HR-1 87
——— ——— and Rauscher leukemia virus. Dual infection of a human lymphoblastoid cell line with.....395
——— ———-related antigens, an immuno-electron microscopic analysis of, in Burkitt lymphoma cells.....629
Escherichia coli. Suppressor mutation induced by 4-nitroquinoline 1-oxide and 4-hydroxyaminoquinoline 1-oxide in.....511
Esterase and acid phosphatase, deviations in isozyme patterns of, and in ultrastructures of Yoshida ascites hepatomas from rat hepatocytes 747
Estradiol, ethynyl-, and megestrol acetate, mammary tumorigenesis by subcutaneous administration of a mixture of, in Wistar rats.....483
α-Fetoprotein. Development of variant tumor cells of Yoshida ascites sarcoma producing 63
——— in rats transplanted with ascites hepatoma.....189
Fibroblasts, mouse, and their SV40-transformed cells, effect of trypsin treatment of, on the agglutinability by several phytoagglutinins having different sugar-binding properties.....269
Gastric cancer, five-year survival rate of, treated with gastrectomy, large-dose of Mitomycin-C, and/or allogeneic bone marrow transplantation 517
——— carcinoma. Immunohistological studies on intestinal mucosa-specific glycoprotein in 231
Geo-pathological study, a comparative, of liver cirrhosis and primary hepatic cancer between Cambridge and Tokyo 765
Glandular stomach, histogenesis and autoradiography of adenocarcinoma of, in rats induced by oral administration of N,N′-2,7-fluorenylenebisacetamide combined with irradiation to the stomach region 143
Gliomas, experimental mouse, chromosome studies in.....181
Gluose-6-phosphatase, aldolase, and alkaline phosphatase, changes in the activities of, during azo-dye carcinogenesis 31
Glycoprotein, intestinal mucosa-specific, immunohistological studies on, in gastric carcinoma.....231
———, serum, levels in the rat bearing ascites hepatoma 109A.....591
———, mucosal, immunohistological studies on, in rectal carcinoma 743
Hamsters. Spontaneous tumors in: Incidence, morphology, transplantation, and virus studies.....329
——— cell *in vitro,* neoplastic transformation of, by bovine adenovirus type-3 415

——— of various ages. Growth characteristics of tumors induced by bovine adenovirus type-3 in 615
Hemangioma lesions, induction of, with dimethylnitrosoamine: Influence of route of administration and strain of mice 499
Hepatic cancer, primary, and liver cirrhosis, a comparative geo-pathological study of, between Cambridge and Tokyo 765
——— tumor, high yield of, in rats by cycasin 575
Hepatocarcinogens. Ultrastructural changes in nuclei and nucleoli of rat liver cells treated with.....419
Hepatocarcinogenesis. Combination of enzyme histochemistry and radioautography: A new method applied to analysis of 509
Hepatocarcinogenicity effect of α-, β-, γ-, and δ-isomers of benzene hexachloride in mice 393
——— of polychlorinated biphenyls in mice.....805
Hepatoma, influence of blood transfusion on induction of, in rats fed 4-(dimethylamino)azobenzene 131
Histochemistry, enzyme, and radioautography, combination of : A new method applied to analysis of hepatocarcinogenesis 509
Histone and aliphatic amino acids. Interaction of 4-nitroquinoline 1-oxide and related carcinogens with 713
HL-A antigenic loss in a cancer patient: A case report.....495
Hormone effect on tyrosine aminotransferase activities in Yoshida sarcoma and its variant lines 397
Human cells, cultured lymphoblastoid. Shape and motility of.....361
Hypoalbuminemic substance from Ehrlich solid carcinoma 277
Hypothermia, differential. Ultrastructural findings of adenovirus type 12-induced tumor cells treated by 725
ICR female mice, unusual proliferation of bile-duct cells in, given 2,7-fluorenylbisacetamide while nursing sucklings.....507
Immunohistology studies on mucosal glycoprotein in rectal carcinoma 743
Immunosuppressive activity and antitumor activity of alkyldithiopurine derivatives 523
Irradiation to the stomach region. Histogenesis and autoradiography of adenocarcinoma of the glandular stomach in rats induced by oral administration of N,N′-2,7-fluorenylenebisacetamide combind with 143
Isoenzyme, placental-type alkaline phosphatase, production of, by lung cancer tissue 217
pI-Isozymes of liver pyruvate kinase. Effect of injection of chromatins from Rhodamine sarcoma into rats on.....239
Isozyme patterns, deviations in, of acid phosphatase and esterase, and in ultrastructures of Yoshida ascites hepatomas from rat hepatocytes 747
L cells, cultured mouse, lethal effect of Bleomycin on: Comparison between fractionated and continuous treatment...645
Lactate dehydrogenase isozyme in mouse lung cancer produced by 4-nitroquinoline 1-oxide 153
Leukemia, nasopharyngeal carcinoma, malignant lymphoma, and in control groups. Antibodies to a new antigen induced by Epstein-Barr virus in patients with.....49
———, rat, induced by N-nitrosobutylurea. Virus particles in 261
———, transplantable rat, DBLA-6, sensitivity of, to antitumor agents.....281
——— cells, L5178Y. Relation between replicating DNA and nuclear membrane in 291
——— L-1210, lymphoid, mouse, complete inhibition of, by Carbazilquinone 487
Ligase, polynucleotide, in rat tissues and ascites hepatoma.....251

Liver of tumor-bearing animals. A factor responsible for the metabolic deviations in 555
——— **catalase,** impaired synthesis of, in tumor-bearing rats 57
—— ——— -depressing substance, *in vivo,* molecular size of, from Rhodamine sarcoma of rat.....95
——— ——— -depressing substance, *in vivo,* intracellular distribution of, in Rhodamine sarcoma 201
——— ———, mouse. Effect of some antitumor drugs on metabolism of.....539
——— **cells,** rat, treated with hepatocarcinogens. Ultrastructural changes in nuclei and nucleoli of.....419
Lung cancer, mouse, lactate dehydrogenase isozyme in, produced by 4-nitroquinoline 1-oxide 153
——— ——— **tissue.** Production of the placental-type alkaline phosphatase isoenzyme by 217
Lymphoblastoid cells, cultured human. Shape and motility of.....361
Lymphoma, malignant, nasopharyngeal carcinoma, leukemia, and in control groups. Antibodies to a new antigen induced by Epstein-Barr virus in patients with.....49
——— cell line P3HR-1, Burkitt. Production of infective Epstein-Barr virus in 87
——— **cells,** Burkitt. An immunoelectron microscopic analysis of Epstein-Barr virus-related antigens in.....629
Lymphocytic sarcoma of the mouse associated with virus-like particles.....313
——— ———, transplanted, and reticulum cell sarcoma, effect of 2,2-*O*-cyclocytidine on, in mice 379
Macrophages. Rôle of concanavalin-A in tumor cell agglutination and adhesion to 795
Mammalian cells, cultured. Lethal effect of Mitomycin-C on 317
——— ———, quantitative clonal growth of: Its application for quantitative study of cytocidal action of Mitomycin-C.....773
——— ———, cultured, biological and biochemical alterations in, induced by sugars related to cell membrane 785
Mammary carcinoma, possibility of using an alkylating agent in radiotherapy of, in C3H/He mice.....491
Mastomys. Spontaneous endocrine tumors in.....135
Megestrol acetate and ethynylestradiol, mammary tumorigenesis by subcutaneous administration of a mixture of, in Wistar rats 483
Metabolic deviations, a factor responsible for, in liver of tumor-bearing animals.....555
Metabolism of butyl(4-hydrxybutyl)-nitrosoamine in rats.....391
———, effect of some antitumor drugs on, of mouse liver catalase.....539
Metastasis, lung, microscopic, from thyroid adenocarcinoma discovered at autopsy.....437
———, liver. Prophylactic use of chemotherapeutic agent on.....531
Mitochondrial oxidation of 3,3′-diaminobenzidine and related compounds, and their possible relation to carcinogenesis 665
Mitomycin-C, lethal effect of, on cultured mammalian cells 317
——— and a streptococcal preparation PC-B-45, effectiveness of treatment using, on transplanted mouse tumor 387
———. Quantitative clonal growth of mammalian cells: Its application for quantitative study of cytocidal action of 773
Mucopolysaccharides, acid, in Silicone-induced tumors of rats.....167
Murine sarcoma virus, induction of rat osteosarcoma by inoculation of, into bone marrow 141
——— ——— ——— (Moloney). Different neoplastic response of mice and rats to infection by.....445
——— ——— ——— (Moloney). Establishemnt of a virus-persistent cell

line and deviation of malignant cell clones from rat osteosarcoma induced by 459

Mutagenic activity of 4-nitroquinoline 1-oxide and 4-hydroxyaminoquinoline 1-oxide in *Neurospora crassa*.....265

Mutation, suppressor, induced by 4-nitroquinoline 1-oxide and 4-hydroxyaminoquinoline 1-oxide in *Escherichia coli* 511

Nasopharyngeal carcinoma, leukemia, malignant lymphoma, and in control groups. Antibodies to a new antigen induced by Epstein-Barr virus in patients with.....49

Nitrofurans, effect of, on liver RNA metabolism associated with prevention of carcinogenesis, and selective inhibition of RNA polymerase activity in rat liver nuclei by 4-(dimethylamino)azobenzene 1

Nitrogen mustard. Chemical modification of cell membrane of Yoshida sarcoma cells by 6,6-dithiodinicotinic acid and its effect on sensitivity to 757

Nitrosoamine, butyl(3-carboxypropyl)-, induction of urinary bladder tumors in ACI/H rats by, a major urinary metabolite of butyl(4-hydroxybutyl)-nitrosoamine.....637

————, **butyl(4-hydroxybutyl)-,** metabolism of, in rats.....391

————, ————————. Induction of urinary bladder tumors in ACI/N rats by butyl(3-carboxypropyl)nitrosoamine, a major urinary metabolite of 637

————, **dimethyl-.** Induction of hemangiomatous lesions with: Influence of route of administration and strain of mice 499

Nitrosoguanidine, N-methyl-N′-nitro-N-. Electron spin resonance study on the free radical production from.....471

Nuclei, rat liver, selective inhibition of RNA polymerase activity in, by 4-(dimethylamino)azobenzene, and effect of nitrofurans on liver RNA metabolism associated with prevention of carcinogenesis 1

———— and nucleoli, ultrastructural changes in, of rat liver cells treated with hepatocarcinogens 419

———— of Ehrlich ascites tumor cells, immunosuppressive activity of chromatin fraction derived from 633

Osteosarcoma, rat, induction of, by inoculation of murine sarcoma virus into bone marrow 141

————, rat, induced by a murine sarcoma virus (Moloney). Establishment of a virus-persistent cell line and deviation of malignant cell clones from...459

Ovarian tumors, frequent development of, from dysgenetic ovaries of neonatally thymectomized mice 139

Paramyxovirus (HVJ). Lowered transplantability of cultured tumor cells by persistent infection with 647

Parenchymal cells of rat liver. Radiation effect on.....345

Particles, A-type and C-type intracisternal, observed in pulmonary tumors in mice 563

PC-B-45, streptococcal preparation, and Mitomycin-C, effectiveness of treatment using, on transplanted mouse tumor ...387

Peritoneal bleeding of the rat bearing ascites hepatoma, AH-13.....11

Phenothiazines, haloacetyl-, antitumor activity of, against ascites sarcoma-180...225

————, ————. Effect of structural modification on antitumor activity of 375

Phytoagglutinins, several, having different sugar-binding properties. Effect of trypsin treatment of mouse fibroblasts and their SV40-transformed cells on the agglutinability by 269

Polychlorinated biphenyls, hepatocarcinogenicity of, in mice.....805

Pulmonary tumor in mice. Intracisternal A-type and C-type particles observed in 563

Purine, alkyldithio-, derivatives. Antitumor and immunosuppressive activities of.....523

Pyrimidine metabolism in normal and tumor tissues.....685
Pyruvate kinase, liver. Effect of injection of chromatins from Rhodamine sarcoma into rats on pI-isozymes of.....239
Quinoline 1-oxide, 4-hydroxyamino-, and 4-nitroquinoline 1-oxide, mutagenic activity of, in *Neurospora crassa*.....265
———— ————, ————————, and 4-nitroquinoline 1-oxide, suppressor mutation induced by, in *Escherichia coli*...511
———— ————, **4-nitro-,** and its derivatives. Immune suppression induced by 111
———— ————, ————. Lactate dehydrogenase isozyme in mouse lung cancer produced by.....153
———— ————, ————, derivatives, carcinogenic, chemical binding of, with DNA *in vivo* and *in vitro*.....161
———— ————, ————, and 4-hydroxyaminoquinoline 1-oxide, mutagenic activity of, in *Neurospora crassa*.....265
———— ————, ————, carcinogenic, and DNA, charge transfer in the molecular interaction of, with special reference to analysis at the nucleoside level.....427
———— ————, ————, and 4-hydroxyaminoquinoline 1-oxide, suppressor mutation induced by, in *Escherichia coli* 511
———— ————, ————, and related carcinogens, effect of, on the viscosity of DNA at elevated temperatures.....639
———— ————, ————, and related carcinogens, interaction of, with histone and aliphatic amino acids 713
Radiation effect on parenchymal cells of rat liver 345
Radioautography and enzyme histochemistry, combination of: A new method applied to analysis of hepatocarcinogenesis 509
Radiosensitivity of islet-forming ascites tumors of rat 337
Radiotherapy, possibility of using an alkylating agent in, of mammary carcinoma in C3H/He mice.....491
Rauscher leukemia virus and Epstein-Barr virus. Dual infection of a human lymphoblastoid cell line with.....395
Rectal carcinoma. Immunohistological studies on mucosal glycoprotein in 743
Reticulum cell sarcoma and transplanted lymphocytic sarcoma, effect of 2,2-*O*-cyclocytidine on, in mice 379
Rhodamine sarcoma of rat. Molecular size of *in vivo* liver catalase-depressing substance from 95
———— ————. Intracellular distribution of *in vivo* liver catalsae-depressing substance in 201
———— ————, effect of injection of chromatins from, into rats on pI-isozymes of liver pyruvate kinase.....239
RNA species hybridizable to cellular or viral DNA, size distribution of, in the cells transformed by adenovirus type-2 801
—— **polymerase** activity, selective inhibition of, in rat liver nuclei by 4-(dimethylamino)azobenzene, and effect of nitrofurans on liver RNA metabolism associated with prevention of carcinogenesis 1
Rous sarcoma virus. Subcellular localization of avian leucosis group-specific complement-fixing antigens in mouse ascites sarcoma cells (SR-C3H/He cells) induced by Schmidt-Ruppin strain of ...657
Structural modification, effect of, on antitumor activity of haloacetylphenothiazines 375
Sugars related to cell membrane. Biological and biochemical alterations in cultured mammalian cells induced by ...785
Survival rate, five-year, of gastric cancer treated with gastrectomy, large-dose of Mitomycin-C, and/or allogeneic bone marrow transplantation.....517
Tenuazonic acid analogs, carcinostatic. Metaphase-arresting action of.....79
Teratogenesis and carcinogenesis in relation to organogenesis. Carcinogenesis by urethan in mice 731
Thiopentane, dimethanesulfonyl-. Mechanism of antitumor action of.....701

Thymus-derived cell, suppressed activity of, in tumor-bearing host.....273
Toxohormone. Purification of.....605
Transplants, vaginal, carcinogenesis by, from ovariectomized, neonatally estrogenized mice into ovariectomized normal hosts.....73
Trypsin treatment, effect of, of mouse fibroblasts and their SV40-transformed cells on the agglutinability by several phytoagglutinins having different sugar-binding properties 269
Tumors, spontaneous, in hamsters: Incidence, morphology, transplantation, and virus studies.....329
——— **cells** sensitized with immunized rabbit serum. Induction of resistance against Ehrlich carcinoma by.....173
——— ———, cultured, decrease in agglutinability of, to concanavalin-A at the plateau of cell growth.....505
——— ———, cultured, lowered transplantability of, by persistent infection with paramyxovirus (HVJ) 647
——— ———, adenovirus type 12-induced, ultrastructural findings of, treated by differential hypothermia 725
——— **growth,** effect of dietary modification on, in mice bearing sarcoma-180 and Ehrlich carcinoma 547
——— ———. Effect of cryosurgical freezing on 625
Tumorigenesis, mammary, by subcutaneous administration of a mixture of megestrol acetate and ethynlestradiol in Wistar rats 483
Tyrosine aminotransferase activities, hormonal effect on, in Yoshida sarcoma and its variant lines.....397
Urea, N-nitrosobutyl-. Virus particles in rat leukemia induced by.....261
Urethan administration to suckling rats, strain difference in carcinogenesis by ...209
———, carcinogenesis by, in mice: Treatogenesis and carcinogenesis in relation to organogenesis 731
Urogenital tumors, human. Arginase in 693
Virus particles in rat leukemias induced by N-nitrosobutylurea.....261
———like particles. Lymphocytic sarcoma of the mouse associated with.....313
Wistar rats. Mammary tumorigenesis by subcutaneous administration of a mixture of megestrol acetate and ethynylestradiol in 483
Yeast mannan preparation, antitumor activity of, in relation to the effect of chemical modification 365
——— ———, carboxymethylated, distribution of, in normal and tumor-bearing mice.....675
Yoshida ascites hepatomas, deviations in isozyme patterns of acid phosphatase and esterase, and in ultrastructures of, from rat hepatocytes 747
——— ——— **sarcoma** producing α-fetoprotein. Development of variant tumor cells of 63
——— **sarcoma** and its variant lines. Hormonal effect on tyrosine aminotransferase activities in 397
——— ——— **cells,** chemical modification of cell membrane of, by 6,6-dithiodinicotinic acid and its effect on sensitivity to nitrogen mustard 757
